Corn Terminology Crossword

Complete the crossword puzzle below

Created using the Crossword Maker on TheTeachersCorner.net

Across

1. The edible part that comes from the flower that contains seeds of the plant.
4. Corn grows two different flowers called tassel (male) and ear (female).
6. What starts to develop as the plant germinates.
10. Insects and animals that carry pollen to help plants produce fruit or seeds.
12. A powdery substance that helps plants grow new seeds.

Down

2. The male part of a corn plant that produces pollen to cause the corn ear to grow.
3. One of the first seed leaves, stored in the seed, to develop as the seed sprouts.
5. The process when the seed starts growing into a plant.
7. The young plant that grows from the seed.
8. Seeds that contain only one cotyledon. When they emerge from the soil they generally will have only one leaf.
9. A tall plant that grows yellow seeds (kernels) on an ear that are edible for humans and animals.
11. Shiny, thread-like fibers that help develop kernels on an ear of corn.
