

ANATOMY OF A LAMB

Activity:

After studying, fill in the names of each part of the lamb's body. See how many you can get right!

Mini Quiz:

Fill in the blank:

- Lambs often have their tails docked to prevent _____, a condition caused by manure buildup that attracts flies.

Multiple Choice:

- What does a wide, well-sprung rib cage in a lamb indicate?
 - The lamb is tired
 - The lamb is too fat
 - The lamb has good body capacity and health
 - The lamb is ready to shear

Fill in the blank:

- The _____ is one of the most valuable meat cuts on a lamb and is closely judged in contests.
